DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3, 5, 7-21 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki in view of Schlager or the Japanese Patent Tatsuaki.

Response to Arguments

Applicant's arguments filed 2/6/06 have been fully considered but they are not persuasive.

Applicants argue that the *prima facie* case for obviousness has not been made by the combination, and that *arguendo* the present method produces unexpected results typified by Examples 2-4 in the specification.

The Suzuki patent teaches the use of mixing during electrolysis to obtain efficient treatment to complete the electrolysis (see col. 11, lines 22-32). The patent teaches the use of a revolving plate or rod or other conventional techniques so that "the electrolytic solution on the electrode surface can be moved to a satisfactory extent." (lines 26-27 of col. 11). To optimize the process disclosed by the Suzuki patent to obtain a workable range through routine experimentation

would have been within the purview of the ordinary artisan. Discovery of optimum value of result effective variable in known process is ordinarily within skill of art. *In re Boesch and Slaney* 205 USPQ 215. (CCPA 1980).

The secondary references were cited to show the use of vibrating plates to provide mixing. Accordingly, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Suzuki patent with the teachings of the secondary reference, because the secondary references teach the use of vibrating plates to mix the electrolyte during electrodes.

It is unclear what examples 2-4 are supposed to show, since the Suzuki patent teaches the use of microorganisms following the electrolysis.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
